Teac	aching Scheme Credits				Marks		Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

#### **Teaching and Examination Scheme:**

**Scope:** This subject is designed to impart fundamental knowledge on the structure and functions of the various systems of the human body. It also helps in understanding both homeostatic mechanisms. The subject provides the basic knowledge required to understand the various disciplines of pharmacy.

Objectives: Upon completion of this course the student should be able to

- Explain the gross morphology, structure and functions of various organs of the human body.
- > Describe the various homeostatic mechanisms and their imbalances.
- > Identify the various tissues and organs of different systems of human body.
- > Perform the various experiments related to special senses and nervous system.
- > Appreciate coordinated working pattern of different organs of each system

COURSE CONTENT	

UNIT	CONTENT	No.
		ofHrs.
Ι	Introduction to human body: Definition and scope of anatomy and physiology,	
	levels of structural organization and body systems, basic life processes,	10
	homeostasis, basic anatomical terminology.	
	Cellular level of organization: Structure and functions of cell, transport across	
	cell membrane, cell division, cell junctions. General principles of cell	
	communication, intracellular signaling pathway activation by extracellular signal	
	molecule, Forms of intracellular signaling: a) Contact-dependent b) Paracrine c)	
	Synaptic d) Endocrine.	
	Tissue level of organization: Classification of tissues, structure, location and	

Page **12** of **161** 

P. Technical University Hamirpur - 177001

	functions of epithelial, muscular and nervous and connective tissues.	
II	Integumentary system: Structure and functions of skin.	10
	Skeletal system: Divisions of skeletal system, types of bone, salient features and	
	functions of bones of axial and appendicular skeletal system Organization of	
	skeletal muscle, physiology of muscle contraction, neuromuscular junction.	
	Joints: Structural and functional classification, types of joints movements and its articulation	
III	Body fluids and blood: Body fluids, composition and functions of blood,	10
	hemopoeisis, formation of hemoglobin, anemia, mechanisms of coagulation,	10
	blood grouping, Rh factors, transfusion, its significance and disorders of blood,	
	Reticulo endothelial system.	
	<b>Lymphatic system:</b> Lymphatic organs and tissues, lymphatic vessels, lymph circulation and functions of lymphatic system	
IV	Peripheral nervous system: Classification of peripheral nervous system:	
	Structure and functions of sympathetic and parasympathetic nervous system.	08
	Origin and functions of spinal and cranial nerves.	
	Special senses: Structure and functions of eye, ear, nose and tongue and their	
	disorders.	
V	Cardiovascular system: Heart – anatomy of heart, blood circulation, blood	07
	vessels, structure and functions of artery, vein and capillaries, elements of	
	conduction system of heart and heart beat, its regulation by autonomic nervous	
	system, cardiac output, cardiac cycle. Regulation of blood pressure, pulse,	
	electrocardiogram and disorders of heart.

#### BP107P: HUMAN ANATOMY AND PHYSIOLOGY (Practical)

Teac	hing Scl	neme	Credits		Marks	Duration of End Semester	
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
0	0	4	2	15	35	50	3 hours

#### **Teaching and Examination Scheme:**

Practical physiology is complimentary to the theoretical discussions in physiology. Practicals allow the verification of physiological processes discussed in theory classes through experiments on living tissue, intact animals or normal human beings. This is helpful for developing an insight on the subject.

- 1. Study of compound microscope.
- 2. Microscopic study of epithelial and connective tissue
- 3. Microscopic study of muscular and nervous tissue
- 4. Identification of axial bones
- 5. Identification of appendicular bones
- 6. Introduction to hemocytometry.
- 7. Enumeration of white blood cell (WBC) count
- 8. Enumeration of total red blood corpuscles (RBC) count
- 9. Determination of bleeding time
- 10. Determination of clotting time
- 11. Estimation of hemoglobin content
- 12. Determination of blood group.
- 13. Determination of erythrocyte sedimentation rate (ESR).
- 14. Determination of heart rate and pulse rate.
- 15. Recording of blood pressure.

#### **Teaching Scheme Duration of End Semester** Credits Marks Examination Т С L Р Sessional **End Semester** Total Exam 3 1 0 4 75 3 hours 25 100

#### **Teaching and Examination Scheme:**

**Scope**: This course deals with the fundamentals of analytical chemistry and principles ofelectrochemical analysis of drugs

**Objectives:** Upon completion of the course student shall be able to

- > understand the principles of volumetric and electro chemical analysis
- > carryout various volumetric and electrochemical titrations
- develop analytical skills

#### **COURSE CONTENT**

UNIT	CONTENT	No. ofHrs.
Ι	(a) Pharmaceutical analysis- Definition and scope	10
	i) Different techniques of analysis	
	ii) Methods of expressing concentration	
	iii) Primary and secondary standards.	
	iv) Preparation and standardization of various molar and normal solutions-	
	Oxalic acid, sodium hydroxide, hydrochloric acid, sodium	
	thiosulphate, sulphuric acid, potassium permanganate and ceric ammonium	
	sulphate	
	(b)Errors: Sources of errors, types of errors, methods of minimizing	
	errors, accuracy, precision and significant figures	
	(c)Pharmacopoeia, Sources of impurities in medicinal agents, limit tests.	
II	Acid base titration: Theories of acid base indicators, classification of acid base	10
	titrations and theory involved in titrations of strong, weak, and very weak acids and	
	bases, neutralization curves	
	Non aqueous titration: Solvents, acidimetry and alkalimetry titration and	
	estimation of Sodium benzoate and Ephedrine HCl	

Page **16** of **161** 

H.P. Technical University Hamirpur - 177001

III	Precipitation titrations: Mohr's method, Volhard's, Modified Volhard's, Fajans	10					
	method, estimation of sodium chloride.						
	Complexometric titration: Classification, metal ion indicators, masking and						
	demasking reagents, estimation of Magnesium sulphate, and calcium gluconate.						
	Gravimetry: Principle and steps involved in gravimetric analysis. Purity of the						
	precipitate: co-precipitation and post precipitation, Estimation of barium sulphate.						
	Basic Principles, methods and application of diazotisation titration.						
IV	Redox titrations						
	(a) Concepts of oxidation and reduction	08					
	(b) Types of redox titrations (Principles and applications)Cerimetry,						
	Iodimetry, Iodometry, Bromatometry, Dichrometry, Titration						
	withpotassium iodate						
V	Electrochemical methods of analysis	07					
	Conductometry- Introduction, Conductivity cell, Conductometric titrations,						
	applications.						
	Potentiometry - Electrochemical cell, construction and working of reference						
	(Standard hydrogen, silver chloride electrode and calomel electrode) and indicator						
	electrodes (metal electrodes and glass electrode), methods to determine end point of						
	potentiometric titration and applications.						
	Polarography - Principle, Ilkovic equation, construction and working of dropping						
	mercury electrode and rotating platinum electrode, applications

**Scope:** This course is designed to impart a fundamental knowledge on the preparatorypharmacy with arts and science of preparing the different conventional dosage forms.

**Objectives:** Upon completion of this course the student should be able to:

- ➤ Know the history of profession of pharmacy
- Understand the basics of different dosage forms, pharmaceutical incompatibilities andpharmaceutical calculations
- > Understand the professional way of handling the prescription
- Preparation of various conventional dosage forms

#### COURSE CONTENT

UNIT	CONTENT	No. ofHrs.					
Ι	Historical background and development of profession of pharmacy: History of						
	profession of Pharmacy in India in relation to pharmacy education, industry and	10					
	organization, Pharmacy as a career, Pharmacopoeias: Introduction to IP, BP, USP						
	and Extra Pharmacopoeia.						
	Dosage forms: Introduction to dosage forms, classification and definitions						
	<b>Prescription:</b> Definition, Parts of prescription, handling of Prescription and Errors						
	in prescription.						
	Posology: Definition, Factors affecting posology. Pediatric dose calculations						
	based on age, body weight and body surface area.						
II	Pharmaceutical calculations: Weights and measures – Imperial & Metric system,						
	Calculations involving percentage solutions, alligation, proof spirit and isotonic	10					
	solutions based on freezing point and molecular weight.						
	Powders: Definition, classification, advantages and disadvantages, Simple &						
	compound powders - official preparations, dusting powders, effervescent,						

H.P. Technical University Hamirpur - 177001

Liquid dosage forms: Advantages and disadvantages of liquid dosage forms.Excipients used in formulation of liquid dosage forms. Solubility enhancement techniquesIIIMonophasic liquids: Definitions and preparations of Gargles, Mouthwashes, Throat Paint, Eardrops, Nasal drops, Enemas, Syrups, Elixirs, Liniments andLotions.Other Biphasic liquids: Suspensions: Definition, advantages and disadvantages, classifications, Preparation of suspensions; Flocculated and Deflocculated	;
III       Monophasic liquids: Definitions and preparations of Gargles, Mouthwashes,       0         Throat Paint, Eardrops, Nasal drops, Enemas, Syrups, Elixirs, Liniments andLotions.       0         Biphasic liquids: Suspensions: Definition, advantages and disadvantages,       0	;
III       Monophasic liquids: Definitions and preparations of Gargles, Mouthwashes,       03         Throat Paint, Eardrops, Nasal drops, Enemas, Syrups, Elixirs, Liniments andLotions.       04         Biphasic liquids:       Suspensions: Definition, advantages and disadvantages,       05	}
Throat Paint, Eardrops, Nasal drops, Enemas, Syrups, Elixirs, Liniments andLotions.       03         Biphasic liquids:       Suspensions: Definition, advantages and disadvantages,	;
Throat Paint, Eardrops, Nasal drops, Enemas, Syrups, Elixirs, LinimentsandLotions.Biphasic liquids: Suspensions: Definition, advantages and disadvantages,	5
Biphasic liquids: Suspensions: Definition, advantages and disadvantages,	
classifications, Preparation of suspensions; Flocculated and Deflocculated	
suspension & stability problems and methods to overcome. Emulsions:	
Definition, classification, emulsifying agent, test for the identification of type of	
Emulsion, Methods of preparation & stability problems and methods to overcome.	
IV Suppositories: Definition, types, advantages and disadvantages, types of bases,	
methods of preparations. Displacement value & its calculations, evaluation of	•
suppositories.	
Pharmaceutical incompatibilities: Definition, classification, physical, chemical	
and therapeutic incompatibilities with examples.	
V Semisolid dosage forms: Definitions, classification, mechanisms and factors 0'	/
influencing dermal penetration of drugs. Preparation of ointments, pastes, creams	
and gels. Excipients used in semi solid dosage forms. Evaluation of semi solid	
dosages forms

**1**. Syrups: a) Syrup IP'66

b) Compound syrup of Ferrous Phosphate BPC'68

- **2. Elixirs:** a) Piperazine citrate elixir
- b) Paracetamol pediatric elixir
- 3.Linctus a) Terpin Hydrate Linctus IP'66
- 4. Solutionsa) Iodine Throat Paint (Mandles Paint)
- b) Strong solution of ammonium acetate
  - c) Cresol with soap solution
  - d) Lugol's solution
- 5. Suspensionsa) Calamine lotion
- b) Magnesium Hydroxide mixture
  - c) Aluminimum Hydroxide gel
- **6. Emulsions** a) Turpentine Liniment
- b) Liquid paraffin emulsion
- 7. Powders and Granulesa) ORS powder (WHO)
- b) Effervescent granules
  - c) Dusting powder
  - d)Divided powders
- 8. Suppositoriesa) Glycero gelatin suppository
- b) Coca butter suppository

c) Zinc Oxide suppository

- 9. Semisolidsa) Sulphur ointment
- b) Non staining-iodine ointment with methyl salicylate

c) Carbopal gel

#### 10. Gargles and Mouthwashesa) Iodine gargleb) Chlorhexidine mouthwash

Teac	hing Sch	neme	Credits	Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
2	0	0	2	15	35	50	1.5 hours

#### **Teaching and Examination Scheme:**

**Scope:** This course will prepare the young pharmacy student to interact effectively withdoctors, nurses, dentists, physiotherapists and other health workers. At the end of thiscourse the student will get the soft skills set to work cohesively with the team as a teamplayer and will add value to the pharmaceutical business.

#### **Objectives:**

Upon completion of the course the student shall be able to

- Understand the behavioral needs for a Pharmacist to function effectively in theareas of pharmaceutical operation
- Communicate effectively (Verbal and Non Verbal)
- > Effectivelymanage the team as a team player
- Develop interview skills
- Develop Leadership qualities and essentials

#### **COURSE CONTENT**

UNIT	CONTENT	No. ofHrs.						
Ι	Communication Skills: Introduction, Definition, The Importance of							
	Communication, The Communication Process - Source, Message, Encoding,	07						
	Channel, Decoding, Receiver, Feedback, Context							
	Barriers to communication: Physiological Barriers, Physical Barriers, Cultural							
	Barriers, Language Barriers, Gender Barriers, Interpersonal Barriers,							
	Psychological Barriers, Emotional barriers							
	Perspectives in Communication: Introduction, Visual Perception, Language,							
	Other factors affecting our perspective - Past Experiences, Prejudices, Feelings,							
	Environment							
II	Elements of Communication: Introduction, Face to Face Communication - Tone							
		07						

P. Technical University Hamirpur - 177001

	of Voice, Body Language (Non-verbal communication), Verbal Communication,							
	Physical Communication							
	Communication Styles: Introduction, The Communication Styles Matrix with							
	example for each -Direct Communication Style, Spirited Communication Style,							
	Systematic Communication Style, Considerate Communication Style							
III	Basic Listening Skills: Introduction, Self-Awareness, Active Listening,	0.						
	Becoming an Active Listener, Listening in Difficult Situations	07						
	Effective Written Communication: Introduction, When and When Not to Use							
	Written Communication - Complexity of the Topic, Amount of Discussion'							
	Required, Shades of Meaning, Formal Communication							
	Writing Effectively: Subject Lines, Put the Main Point First, Know Your							
	Audience, Organization of the Message							
IV	Interview Skills: Purpose of an interview, Do's and Dont's of an interview	07						
	Giving Presentations: Dealing with Fears, Planning your Presentation,	05						
	Structuring YourPresentation, Delivering Your Presentation, Techniques of							
	Delivery							
V	Group Discussion: Introduction, Communication skills in group discussion, Do's	04						
	and Dont's of group discussion

**Teaching and Examination Scheme:** 

**Scope:** To learn and understand the components of living world, structure and functional system of plant and animal kingdom.

Objectives: Upon completion of the course, the student shall be able to

- ▶ know the classification and salient features of five kingdoms of life
- > understand the basic components of anatomy & physiology of plant
- know understand the basic components of anatomy & physiology animal withspecial reference to human

#### **COURSE CONTENT**

UNIT	CONTENT	No. ofHrs.
Ι	Living world: Definition and characters of living organisms; Diversity in the	01111.00
	living world; Binomial nomenclature ; Five kingdoms of life and basis of	07
	classification. Salient features of Monera, Potista, Fungi, Animalia and Plantae,	
	Virus.	
	Morphology of Flowering plants: Morphology of different parts of flowering	
	plants - Root, stem, inflorescence, flower, leaf, fruit, seed.General Anatomy of	
	Root, stem, leaf of monocotyledons & Dicotylidones.	
II	Body fluids and circulation ; Composition of blood, blood groups, coagulation	
	of blood; Composition and functions of lymph; Human circulatory system;	07
	Structure of human heart and blood vessels; Cardiac cycle, cardiac output and	
	ECG	
	Digestion and Absorption : Human alimentary canal and digestive glands; Role	
	of digestive enzymes; Digestion, absorption and assimilation of digested food	
	Breathing and respiration: Human respiratory system; Mechanism of breathing	
	and its regulation; Exchange of gases, transport of gases and regulation of	

Page **29** of **161** 

H.P. Technical University Hamirpur - 177001

	respiration ; Respiratory volumes								
III	Excretory products and their elimination: Modes of excretion; Human								
	excretory system- structure and function; Urine formation; Rennin angiotensin	07							
	system								
	Neural control and coordination: Definition and classification of nervous								
	system; Structure of a neuron; Generation and conduction of nerve impulse;								
	Structure of brain and spinal cord; Functions of cerebrum, cerebellum,								
	hypothalamus and medulla oblongata.								
	Chemical coordination and regulation: Endocrine glands and their secretions;								
	Functions of hormones secreted by endocrine glands								
	Human reproduction: Parts of female reproductive system; Parts of male								
	reproductive system; Spermatogenesis and Oogenesis; Menstrual cycle								
IV	Plants and mineral nutrition: Essential mineral, macro and micronutrients;								
	Nitrogen metabolism, Nitrogen cycle, biological nitrogen fixation	05							
	Photosynthesis: Autotrophic nutrition, photosynthesis, Photosynthetic pigments,								
	Factors affecting photosynthesis.								
V	Plant respiration: Respiration, glycolysis, fermentation (anaerobic).	04							
	Plant growth and development: Phases and rate of plant growth, Condition of								
	growth,Introduction to plant growth regulators								
	Cell - The unit of life ; Structure and functions of cell and cell organelles.Cell								
	division.								
	<b>Tissues :</b> Definition, types of tissues, location and functions.

#### **Teaching and Examination Scheme:**

**Scope:** This is an introductory course in mathematics. This subject deals with theintroduction to Partial fraction, Logarithm, matrices and Determinant, Analyticalgeometry, Calculus, differential equation and Laplace transform.

Objectives: Upon completion of the course the student shall be able to:-

- > Know the theory and their application in Pharmacy
- > Solve the different types of problems by applying theory
- > Appreciate the important application of mathematics in Pharmacy

#### **COURSE CONTENT**

UNIT	CONTENT	No. ofHrs.					
Ι	Partial fraction						
	Introduction, Polynomial, Rational fractions, Proper and Improper	06					
	fractions, Partial fraction , Resolving into Partial fraction, Application of						
	PartialFraction in Chemical Kinetics and Pharmacokinetics						
	Logarithms						
	Introduction, Definition, Theorems/Properties of logarithms, Commonlogarithms,						
	Characteristic and Mantissa, worked examples, application oflogarithm to solve						
	pharmaceutical problems.						
	Function: Real Valued function, Classification of real valued functions,						
	Limits and continuity						
	Introduction , Limit of a function, Definition of limit of a function ( $\in$ - $\delta$						
	definition), $\lim_{x \to a} \frac{x^n - a^n}{x - a} = na^{n-1}$ , $\lim_{\theta \to 0} \frac{\sin \theta}{\theta} = 1$ ,						
II	Matrices and Determinant:						
	Introduction matrices, Types of matrices, Operation on matrices, Transpose of a	06					
	matrix, Matrix Multiplication, Determinants, Properties ofdeterminants, Product

#### BP 201T: HUMAN ANATOMY AND PHYSIOLOGY-II (Theory)

**Teaching and Examination Scheme:** 

Teac	hing Scl	neme	Credits	Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

**Scope:** This subject is designed to impart fundamental knowledge on the structure andfunctions of the various systems of the human body. It also helps in understanding bothhomeostatic mechanisms. The subject provides the basic knowledge required tounderstand the various disciplines of pharmacy.

**Objectives**: Upon completion of this course the student should be able to:

- Explain the gross morphology, structure and functions of various organs of the human body.
- > Describe the various homeostatic mechanisms and their imbalances.
- ➤ Identify the various tissues and organs of different systems of human body.
- Perform the hematological tests like blood cell counts, haemoglobin estimation, bleeding/clotting time etc and also record blood pressure, heart rate, pulse and respiratory volume.
- > Appreciate coordinated working pattern of different organs of each system
- Appreciate the interlinked mechanisms in the maintenance of normal functioning (homeostasis) of human body.

#### **COURSE CONTENT**

UNIT	CONTENT	No. ofHrs.
Ι	<b>Nervous system:</b> Organization of nervous system, neuron, neuroglia, classification andproperties of nerve fibre, electrophysiology, action	10
	potential, nerve impulse, receptors, synapse, neurotransmitters.	
	Central nervous system: Meninges, ventricles of brain andcerebrospinal	
	fluid.structure and functions of brain (cerebrum, brainstem, cerebellum), spinal	
	cord (gross structure, functions of afferent and efferent nerve tracts, reflex activity)	

Page **36** of **161**

Digestive system: Anatomy of GI Tract with special reference to anatomy and	
functions of stomach,(Acid production in the stomach, regulation of acid	10
production throughparasympathetic nervous system, pepsin role in protein	
digestion) small intestineand large intestine, anatomy and functions of salivary	
glands, pancreas and liver, movements of GIT, digestion and absorption of	
nutrients and disorders of GIT.	
Energetics: Formation and role of ATP, Creatinine Phosphate and BMR.	
Respiratory system: Anatomy of respiratory system with special reference to	10
anatomy of lungs, mechanism of respiration, regulation of respirationLung	10
Volumes and capacities transport of respiratory gases, artificial respiration, and	
resuscitation methods.	
Urinary system: Anatomy of urinary tract with special reference to anatomy of	
kidney andnephrons, functions of kidney and urinary tract, physiology of urine	
formation, micturition reflex and role of kidneys in acid base balance, role of RAS	
in kidneyand disorders of kidney.	
Endocrine system	10
Classification of hormones, mechanism of hormone action, structureand functions	10
of pituitary gland, thyroid gland, parathyroid gland, adrenalgland, pancreas, pineal	
gland, thymus and their disorders.	
Reproductive system	09
Anatomy of male and female reproductive system, Functions of male and	
femalereproductive system, sex hormones, physiology of menstruation,	
fertilization, spermatogenesis, oogenesis, pregnancy and parturition	
Introduction to genetics	
Chromosomes, genes and DNA, protein synthesis, genetic pattern of inheritance	
	functions of stomach,(Acid production in the stomach, regulation of acid production throughparasympathetic nervous system, pepsin role in protein digestion) small intestineand large intestine, anatomy and functions of salivary glands, pancreas and liver,movements of GIT, digestion and absorption of nutrients and disorders of GIT. Energetics: Formation and role of ATP, Creatinine Phosphate and BMR. Respiratory system: Anatomy of respiratory system with special reference to anatomy of lungs,mechanism of respiratory gases, artificial respirationLung Volumes and capacities transport of respiratory gases, artificial respiration,and resuscitation methods. 					Exam		
0	0	2	1	10	15	25	4 hours

#### **Teaching and Examination Scheme:**

Practical physiology is complimentary to the theoretical discussions inphysiology. Practicals allow the verification of physiological processes discussed in theory classes through experiments on living tissue, intact animals or normalhuman beings. This is helpful for developing an insight on the subject.

- 1. To study the integumentary and special senses using specimen, models, etc.,
- 2. To study the nervous system using specimen, models, etc.,
- 3. To study the endocrine system using specimen, models, etc
- 4. To demonstrate the general neurological examination
- 5. To demonstrate the function of olfactory nerve
- 6. To examine the different types of taste.
- 7. To demonstrate the visual acuity
- 8. To demonstrate the reflex activity
- 9. Recording of body temperature
- 10. To demonstrate positive and negative feedback mechanism.
- 11. Determination of tidal volume and vital capacity.
- 12. Study of digestive, respiratory, cardiovascular systems, urinary and reproductive systems with the help of models, charts and specimens.
- 13. Recording of basal mass index .
- 14. Study of family planning devices and pregnancy diagnosis test.
- 15. Demonstration of total blood count by cell analyser
- 16. Permanent slides of vital organs and gonads.

**Scope:** This subject deals with classification and nomenclature of simple organiccompounds, structural isomerism, intermediates forming in reactions, important physicalproperties, reactions and methods of preparation of these compounds. The syllabus alsoemphasizes on mechanisms and orientation of reactions.

Objectives: Upon completion of the course the student shall be able to

- ▶ write the structure, name and the type of isomerism of the organic compound
- > write the reaction, name the reaction and orientation of reactions
- account for reactivity/stability of compounds,
- identify/confirm the identification of organic compound

#### **COURSE CONTENT**

General methods of preparation and reactions of compounds superscripted with asterisk (\*) to be ExplainedTo emphasize on definition, types, classification, principles/mechanisms, applications, examplesand differences

UNIT	CONTENT	No. ofHrs.
Ι	Classification, nomenclature and isomerism: Classification of Organic	
	Compounds, Common and IUPAC systems of nomenclature of organic	07
	compounds(up to 10 Carbons open chain and carbocyclic compounds).	
	Structural isomerisms in organic compounds	
II	Alkanes*, Alkenes* and Conjugated dienes*: SP3 hybridization in alkanes,	
	Halogenation of alkanes, uses of paraffins.Stabilities of alkenes, SP2	10
	hybridization in alkenes	
	E1 and E2 reactions – kinetics, order of reactivity of alkyl halides,	
	rearrangement of carbocations, Saytzeffs orientation and evidences. E1 verses E2	

Page **40** of **161** 

.P. Technical University Hamirpur - 177001

	reactions, Factors affecting E1	
	and E2 reactions. Ozonolysis, electrophilic addition reactions of alkenes,	
	Markownikoff'sorientation, free radical addition reactions of alkenes, Anti	
	Markownikoff's orientation. Stability of conjugated dienes, Diel-Alder,	
	electrophilic addition, free radical additionreactions of conjugated dienes, allylic	
	rearrangement	
III	Alkyl halides*: SN1 and SN2 reactions - kinetics, order of reactivity of alkyl	
	halides, stereochemistry andrearrangement of carbocations.SN1 versus SN2	10
	reactions, Factors affecting SN1 and SN2 reactions. Structure and uses of	
	ethylchloride, Chloroform, trichloroethylene,	
	tetrachloroethylene, dichloromethane, tetrachloromethane and iodoform.	
	Alcohols*- Qualitative tests, Structure and uses of Ethyl alcohol, Methyl	
	alcohol, chlorobutanol, Cetosteryl alcohol, Benzyl alcohol, Glycerol, Propylene	
	glycol	
IV	Carbonyl compounds* (Aldehydes and ketones): Nucleophilic addition,	
	Electromeric effect, aldol condensation, Crossed Aldol condensation, Cannizzaro	10
	reaction, Crossed Cannizzaro reaction, Benzoin condensation,	
	Perkincondensation, qualitative tests, Structure and uses of Formaldehyde,	
	Paraldehyde, Acetone, Chloral hydrate, Hexamine, Benzaldehyde, Vanilin,	
	Cinnamaldehyde.	
V	Carboxylic acids*: Acidity of carboxylic acids, effect of substituents on acidity,	08
	inductive effect and qualitativetests for carboxylic acids ,amide and ester.	
	Structure and Uses of Acetic acid, Lactic acid, Tartaric acid, Citric acid,	
	Succinic acid. Oxalicacid, Salicylic acid, Benzoic acid, Benzyl benzoate,	
	Dimethyl phthalate, Methyl salicylate andAcetyl salicylic acid	
	Aliphatic amines* - Basicity, effect of substituent on Basicity. Qualitative test,	
	Structure and uses of Ethanolamine, Ethylenediamine, Amphetamine

#### **Teaching and Examination Scheme:**

#### Systematic qualitative analysis of unknown organic compounds

- 1. Preliminary test: Color, odour, aliphatic/aromatic compounds, saturationand unsaturation, etc.
- 2. Detection of elements like Nitrogen, Sulphur and Halogen byLassaigne's test
- 3. Solubility test
- Functional group test like Phenols, Amides/ Urea, Carbohydrates, Amines, Carboxylic acids, Aldehydes and Ketones, Alcohols, Esters, Aromatic and Halogenated Hydrocarbons, Nitro compounds and Anilides.
- 5. Melting point/Boiling point of organic compounds
- 6. Identification of the unknown compound from the literature usingmelting point/ boiling point.
- 7. Preparation of the derivatives and confirmation of the unknowncompound bymelting point/ boiling point.
- 8. Minimum 5 unknown organic compounds to be analyzed systematically.
- 9. Preparation of suitable solid derivatives from organic compounds
- 10. Construction of molecular models

#### **Recommended Books (Latest Editions)**

- 1. Organic Chemistry by Morrison and Boyd
- 2. Organic Chemistry by I.L. Finar , Volume-I
- 3. Textbook of Organic Chemistry by B.S. Bahl & Arun Bahl.
- 4. Organic Chemistry by P.L.Soni
- 5. Practical Organic Chemistry by Mann and Saunders.
- 6. Vogel's text book of Practical Organic Chemistry
- 7. Advanced Practical organic chemistry by N.K.Vishnoi.
- 8. Introduction to Organic Laboratory techniques by Pavia, Lampman and Kriz.
- 9. Reaction and reaction mechanism by Ahluwaliah/Chatwal.

<b>Teaching Scheme</b>		Scheme Credits		Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

#### **Teaching and Examination Scheme:**

**Scope**: Biochemistry deals with complete understanding of the molecular levels of thechemical process associated with living cells. The scope of the subject is providingbiochemical facts and the principles to understand metabolism of nutrient molecules inphysiological and pathological conditions. It is also emphasizing on genetic organization fmammalian genome and hetero & autocatalytic functions of DNA.

Objectives: Upon completion of course student shell able to

- Understand the catalytic role of enzymes, importance of enzyme inhibitors indesign of new drugs, therapeutic and diagnostic applications of enzymes.
- Understand the metabolism of nutrient molecules in physiological andpathological conditions.
- Understand the genetic organization of mammalian genome and functions of DNA in the synthesis of RNAs and proteins.

#### **COURSE CONTENT**

UNIT	CONTENT	No. ofHrs.
Ι	Biomolecules: Introduction, classification, chemical nature and biological role	
	ofcarbohydrate, lipids, nucleic acids, amino acids and proteins.	08
	Bioenergetics: Concept of free energy, endergonic and exergonic reaction,	
	Relationshipbetween free energy, enthalpy and entropy; Redox potential.Energy	
	rich compounds; classification; biological significances of ATPand cyclic AMP	
II	Carbohydrate metabolism: Glycolysis – Pathway, energetics and significance	
	Citric acid cycle- Pathway, energetics and significance	10
	HMP shunt and its significance; Glucose-6-Phosphate dehydrogenase	
	(G6PD) deficiency ; Glycogen metabolism Pathways and glycogen storage	
	diseases (GSD); Gluconeogenesis- Pathway and its significance	

Page **43** of **161** 

P. Technical University Hamirpur - 177001

	Hormonal regulation of blood glucose level and Diabetes mellitus								
	Biological oxidation: Electron transport chain (ETC) and its								
	mechanism.Oxidative phosphorylation & its mechanism and								
	substratephosphorylation. Inhibitors ETC and oxidative								
	phosphorylation/Uncouplerslevel								
III	<b>Lipid metabolism:</b> β-Oxidation of saturated fatty acid (Palmitic acid)	10							
	Formation and utilization of ketone bodies; ketoacidosis								
	De novo synthesis of fatty acids (Palmitic acid)								
	Biological significance of cholesterol and conversion of cholesterol intobile acids,								
	steroid hormone and vitamin D								
	Disorders of lipid metabolism: Hypercholesterolemia, atherosclerosis, fatty liver								
	and obesity.								
	Amino acid metabolism: General reactions of amino acid metabolism:								
	Transamination, deamination & decarboxylation, urea cycle and its disorders								
	Catabolism of phenylalanine and tyrosine and their metabolic								
	disorders(Phenyketonuria, Albinism, alkeptonuria, tyrosinemia)								
	Synthesis and significance of biological substances; 5-HT, melatonin,dopamine,								
	noradrenaline, adrenaline, Catabolism of heme; hyperbilirubinemia and jaundice								
IV	Nucleic acid metabolism and genetic information transfer								
	Biosynthesis of purine and pyrimidine nucleotides	10							
	Catabolism of purine nucleotides and Hyperuricemia and Gout disease								
	Organization of mammalian genome								
	Structure of DNA and RNA and their functions								
	DNA replication (semi conservative model)								
	Transcription or RNA synthesis								
	Genetic code, Translation or Protein synthesis and inhibitors								
V	Enzymes: Introduction, properties, nomenclature and IUB classification of	07							
	enzymes, Enzyme kinetics (Michaelis plot, Line Weaver Burke plot)								
	Enzyme inhibitors with examples, Regulation of enzymes: enzyme induction and								
	repression, allostericenzymes regulation, Therapeutic and diagnostic applications								
	of enzymes and isoenzymes, Coenzymes –Structure and biochemical functions

**Scope:** Pathophysiology is the study of causes of diseases and reactions of the body tosuch disease producing causes. This course is designed to impart a thorough knowledge of the relevant aspects of pathology of various conditions with reference to itspharmacological applications, and understanding of basic pathophysiological mechanisms. Hence it will not only help to study the syllabus of pathology, but also toget baseline knowledge required to practice medicine safely, confidently, rationally and effectively.

Objectives: Upon completion of the subject student shall be able to -

- > Describe the etiology and pathogenesis of the selected disease states;
- > Name the signs and symptoms of the diseases; and
- Mention the complications of the diseases.

Teac	hing Scl	neme	Credits	Marks			<b>Duration of End Semester</b>
L	Т	Р	С	Sessional	Sessional End Semester Total		Examination
					Exam		
3	0	0	3	25	75	100	3 hours

**Scope:**Environmental Sciences is the scientific study of the environmental system andthe status of its inherent or induced changes on organisms. It includes not only the studyof physical and biological characters of the environment but also the social and cultural factors and the impact of man on environment.

**Objectives:** Upon completion of the course the student shall be able to:

- > Create the awareness about environmental problems among learners.
- > Impart basic knowledge about the environment and its allied problems.
- > Develop an attitude of concern for the environment.
- > Motivate learner to participate in environment protection and environmentimprovement.
- Acquire skills to help the concerned individuals in identifying and solvingenvironmental problems.
- Strive to attain harmony with Nature.

#### **COURSE CONTENT**

UNIT	CONTENT	No. ofHrs.
Ι	The Multidisciplinary nature of environmental studies: Natural Resources	10
	Renewable and non-renewable resources:	10
	Natural resources and associated problems	
	a) Forest resources; b) Water resources; c) Mineral resources; d) Food	
	resources; e) Energy resources; f) Land resources: Role of an individual in	
	conservation of natural resources.	
II	Ecosystems : Concept of an ecosystem, Structure and function of an ecosystem,	
	Introduction, types, characteristic features, structure and function of the	10
	ecosystems: Forest ecosystem; Grassland ecosystem; Desert	

Page **52** of **161** 

.P. Technical University Hamirpur - 177001

	ecosystem; Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)	
III	Environmental Pollution: Air pollution; Water pollution; Soil pollution	10

#### BP301T. PHARMACEUTICAL ORGANIC CHEMISTRY -II (Theory)

Teac	Ceaching Scheme Credits		Marks			Duration of End Semester	
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

#### **Teaching and Examination Scheme:**

**Scope:** This subject deals with general methods of preparation and reactions of someorganic compounds. Reactivity of organic compounds are also studied here. The syllabusemphasizes on mechanisms and orientation of reactions. Chemistry of fats and oils arealso included in the syllabus.

Objectives: Upon completion of the course the student shall be able to

- ▶ write the structure, name and the type of isomerism of the organic compound
- write the reaction, name the reaction and orientation of reactions
- account for reactivity/stability of compounds,
- prepare organic compounds

#### **COURSE CONTENT**

General methods of preparation and reactions of compounds superscripted with asterisk (\*) to be ExplainedTo emphasize on definition, types, classification, principles/mechanisms, applications, examples and differences

UNIT	CONTENT							
Ι	Benzene and its derivatives:							
	A. Analytical, synthetic and other evidences in the derivation of structureof							
	benzene, Orbital picture, resonance in benzene, aromaticcharacters, Huckel's rule							
	B. Reactions of benzene - nitration, sulphonation, halogenations							
	reactivity, Friedelcrafts alkylation-reactivity, limitations, Friedelcrafts acylation.							
	C. Substituents, effect of substituents on reactivity and orientation ofmono							
	substituted benzene compounds towards electrophilicsubstitution reaction							
	D. Structure and uses of DDT, Saccharin, BHC and Chloramine							
II	Phenols* - Acidity of phenols, effect of substituents on acidity, qualitativetests,	10						
	Structure and uses of phenol, cresols, resorcinol, naphthols							

Page **55** of **161** 

P. Technical University Hamirpur - 177001

	Aromatic Amines* - Basicity of amines, effect of substituents on basicity,and									
	synthetic uses of aryl diazonium salts									
	Aromatic Acids* -Acidity, effect of substituents on acidity and important									
	reactions of benzoic acid.									
III	Fats and Oils	10								
	a. Fatty acids – reactions.									
	b. Hydrolysis, Hydrogenation, Saponification and Rancidity of oils, Dryingoils.									
	c. Analytical constants - Acid value, Saponification value, Ester value, Iodine									
	value, Acetyl value, Reichert Meissl (RM) value - significance andprinciple									
	involved in their determination.									
IV	Polynuclear hydrocarbons:	08								
	a. Synthesis, reactions, structure and medicinal uses of Naphthalene,									
	Phenanthrene, Anthracene, Diphenylmethane, Triphenylmethane and their									
	derivatives									
V	Cyclo alkanes*Stabilities – Baeyer's strain theory, limitation of Baeyer's strain	07								
	theory, Coulson and Moffitt's modification, Sachse Mohr's theory (Theory									
	ofstrainless rings), reactions of cyclopropane and cyclobutane only

#### **Teaching and Examination Scheme:**

Teac	ching Scl	ing Scheme Credits		Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
0	0	4	2	15	35	50	3 hours

#### I Experiments involving laboratory techniques

a) Recrystallization b) Steam distillation

#### II Determination of following oil values (including standardization of reagents)

a) Acid value b) Saponification value c) Iodine value

#### **III Preparation of compounds**

- Benzanilide/Phenyl benzoate/Acetanilide from Aniline/ Phenol /Aniline by acylation reaction.
- 2,4,6-Tribromo aniline/Para bromo acetanilide from Aniline/ Acetanilide by halogenation (Bromination) reaction.
- 5-Nitro salicylic acid/Meta di nitro benzene from Salicylic acid / Nitro benzene by nitration reaction.
- Benzoic acid from Benzyl chloride by oxidation reaction.
- Benzoic acid/ Salicylic acid from alkyl benzoate/ alkyl salicylate by hydrolysis reaction.
- 1-Phenyl azo-2-napthol from Aniline by diazotization and coupling reactions.
- Benzil from Benzoin by oxidation reaction.
- Dibenzal acetone from Benzaldehyde by Claison Schmidt reaction
- Cinnammic acid from Benzaldehyde by Perkin reaction
- *P*-Iodo benzoic acid from *P*-amino benzoic acid

#### **BP302T. PHYSICAL PHARMACEUTICS-I (Theory)**

Teac	Teaching Scheme Credits			Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

#### **Teaching and Examination Scheme:**

**Scope:** The course deals with the various physica and physicochemical properties, andprinciples involved in dosage forms/formulations. Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms.

Objectives: Upon the completion of the course student shall be able to

- Understand various physicochemical properties of drug molecules in the designing the dosage forms
- Know the principles of chemical kinetics & to use them for stability testing and determination of expiry date of formulations
- Demonstrate use of physicochemical properties in the formulationdevelopment and evaluation of dosage forms.

UNIT	CONTENT	No. of Hrs.
Ι	Solubility of drugs: Solubility expressions, mechanisms of solute solvent	10
	interactions, ideal solubility parameters, solvation & association, quantitative	
	approach to the factorsinfluencing solubility of drugs, diffusion principles in	
	biological systems. Solubility of gas in liquids, solubility of liquids in liquids,	
	(Binary solutions, ideal solutions)Raoult's law, real solutions. Partiallymiscible	
	liquids, Critical solution temperature and applications. Distribution law, its	
	limitations and applications	
II	States of Matter and properties of matter:State of matter, changes in the state	10
	of matter, latent heats, vapour pressure, sublimation critical point, eutectic	
	mixtures, gases, aerosols- inhalers, relative humidity, liquid complexes, liquid	
	crystals, glassy states, solidcrystalline, amorphous & polymorphism.

#### BP 303 T. PHARMACEUTICAL MICROBIOLOGY (Theory)

#### **Teaching Scheme Duration of End Semester** Credits Marks L Т Р С **End Semester** Total Examination Sessional Exam 75 3 1 0 4 25 100 3 hours

**Teaching and Examination Scheme:** 

**Scope:**Study of all categories of microorganisims especially for the production of alcholantibiotics, vaccines, vitamins enzymes etc..

**Objectives:** Upon completion of the subject student shall be able to;

- Understand methods of identification, cultivation and preservation ofvarious microorganisms
- > To understand the importance and implementation of sterlization inpharmaceutical processing and industry
- > Learn sterility testing of pharmaceutical products.
- > Carried out microbiological standardization of Pharmaceuticals.
- > Understand the cell culture technology and its applications in pharmaceuticalindustries.

#### **COURSE CONTENT**

UNIT	CONTENT	No. of Hrs.
I	Introduction, history of microbiology, its branches, scope and itsimportance. Introduction to Prokaryotes and Eukaryotes, Study of ultra-structure and morphological classification of bacteria, nutritional requirements, raw materials used for culture media and physical parameters for growth, growth curve, isolation and preservation methods for pure cultures, cultivation of anaerobes, quantitative measurement of bacterial growth (total & viable count). Study of different types of	10
П	phase constrast microscopy, dark fieldmicroscopy and electron microscopy. Identification of bacteria using staining techniques (simple, Gram's &Acidfast staining) and biochemical tests (IMViC).Study of principle, procedure, merits, demerits and applications of physical,chemical gaseous,radiation and mechanical method of sterilization.Evaluation of the efficiency of sterilization methods.Equipments employed in large scale sterilization.Sterility indicators.	10

Page **61** of **161** 

H.P. Technical University Hamirpur - 177001

III	Study of morphology, classification, reproduction/replication and cultivation of	10
	Fungi and Viruses. Classification and mode of action of disinfectantsFactors	
	influencing disinfection, antiseptics and their evaluation. Forbacteriostatic and	
	bactericidal actionsEvaluation of bactericidal & Bacteriostatic.Sterility testing of	
	products (solids, liquids, ophthalmic and other sterileproducts) according to IP,	
	BP and USP.	
IV	Designing of aseptic area, laminar flow equipments; study of differentsources of	08
	contamination in an aseptic area and methods of prevention, clean area	
	classification.Principles and methods of different microbiological assay. Methods	
	forstandardization of antibiotics, vitamins and amino acids.Assessment of a new	
	antibiotic.	
V	Types of spoilage, factors affecting the microbial spoilage of pharmaceutical	07
	products, sources and types of microbial contaminants, assessment of microbial	
	contamination and spoilage.Preservation of pharmaceutical products using	
	antimicrobial agents, evaluation of microbial stability of formulations. Growth of	
	animal cells in culture, general procedure for cell culture, Primary, established	
	and transformed cell cultures. Application of cell cultures in pharmaceutical	
	industry and research.

hydrochloride*,Glycopyrrolate, Methantheline bromide, Propantheli	ne
bromide,Benztropine mesylate, Orphenadrine citrate, Biperidi	ne
hydrochloride, Procyclidine hydrochloride*, Tridihexethyl chloride, Isopropami	de
iodide,Ethopropazine hydrochloride.	
IV Drugs acting on Central Nervous System	08
A. Sedatives and Hypnotics:	
Benzodiazepines: SAR of Benzodiazepines, Chlordiazepoxic	le,
Diazepam*,Oxazepam, Chlorazepate, Lorazepam, Alprazolam, Zolpidem	
Barbiturtes: SAR of barbiturates, Barbital*, Phenobarbit	al,
Mephobarbital, Amobarbital, Butabarbital, Pentobarbital, Secobarbital	
Miscelleneous:	
Amides & imides: Glutethmide.Alcohol & their carbamate derivative	es:
Meprobomate, Ethchlorvynol.	
Aldehyde & their derivatives: Triclofos sodium, Paraldehyde.	
B. Antipsychotics	
Phenothiazeines: SAR of Phenothiazeines - Promazi	ne
hydrochloride,Chlorpromazine hydrochloride*, Triflupromazin	ne,
Thioridazinehydrochloride, Piperacetazine hydrochloride, Prochlorperazi	ne
maleate,Trifluoperazine hydrochloride.	
Ring Analogues of Phenothiazeines: Chlorprothixene, Thiothixene, Loxapi	ne
succinate, Clozapine.	
Fluro buterophenones: Haloperidol, Droperidol, Risperidone.	
Beta amino ketones: Molindone hydrochloride. Benzamides: Sulpieride.	
C. Anticonvulsants: SAR of Anticonvulsants, mechanism of anticonvulsant	
Action. Barbiturates: Phenobarbitone, Methabarbital. Hydantoins: Phenytoin	ı*,
Mephenytoin, Ethotoin Oxazolidine diones: Trimethadione, Paramethadio	ne
Succinimides: Phensuximide, Methsuximide, Ethosuximide* Ur	rea
andmonoacylureas: Phenacemide, Carbamazepine*Benzodiazepine	es:
Clonazepam	
Miscellaneous: Primidone, Valproic acid, Gabapentin, Felbamate	
V Drugs acting on Central Nervous System	07

Page **72** of **161** 

Dean H.P. Technical University Hamirpur - 177001

**General anesthetics:** 

Inhalation anesthetics: Halothane\*, Methoxyflurane, Enflurane,Sevoflurane, Isoflurane, Desflurane.

**Ultra short acting barbitutrates:** Methohexital sodium\*, Thiamylalsodium, Thiopental sodium.**Dissociative anesthetics:** Ketamine hydrochloride.\*

Narcotic and non-narcotic analgesics

Morphine and related drugs: SAR of Morphine analogues, Morphinesulphate, Codeine, Meperidine hydrochloride, Anilerdine hydrochloride,Diphenoxylate hydrochloride, Loperamide hydrochloride, Fentanyl citrate\*,Methadone hydrochloride\*, Propoxyphene hydrochloride, Pentazocine,Levorphanol tartarate. Narcotic antagonists: Nalorphine hydrochloride, Levallorphan tartarate,Naloxone hydrochloride.

Sodium Mefenamic **Anti-inflammatory** agents: salicylate, Aspirin, acid\*, Meclofenamate, Indomethacin, Sulindac, Tolmetin, Zomepriac, Diclofenac,Ketorolac, Ibuprofen\*, Phenacetin, Naproxen, Piroxicam, Acetaminophen, Antipyrine, Phenylbutazone.

**Teaching and Examination Scheme:** 

Teac	Teaching Scheme   Credits		Marks			<b>Duration of End Semester</b>	
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

**Scope:** The course deals with the various physica and physicochemical properties, andprinciples involved in dosage forms/formulations. Theory and practical components of the subject help the student to get a better insight into various areas of formulation research and development, and stability studies of pharmaceutical dosage forms.

Objectives: Upon the completion of the course student shall be able to

- Understand various physicochemical properties of drug molecules in the designing the dosage forms
- Know the principles of chemical kinetics & to use them for stability testing and determination of expiry date of formulations
- Demonstrate use of physicochemical properties in the formulationdevelopment and evaluation of dosage forms.

UNIT	CONTENT	No. of Hrs.
I	<b>Colloidal dispersions:</b> Classification of dispersed systems & their generalcharacteristics, size & shapes of colloidal particles, classification of colloids & comparative account of their general properties. Optical, kinetic & electrical properties.Effect of electrolytes, coacervation, peptization& protective action	07
Π	<b>Rheology:</b> Newtonian systems, law of flow, kinematic viscosity, effect of temperature,non-Newtonian systems, pseudoplastic, dilatant, plastic, thixotropy, thixotropy informulation, determination of viscosity, capillary, falling Sphere, rotational viscometers. <b>Deformation of solids:</b> Plastic and elastic deformation, Heckel equation, Stress, Strain,Elastic Modulus	10

**Teaching and Examination Scheme:** 

Teac	Teaching Scheme   Credits		Marks			Duration of End Semester	
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

**Scope:** The main purpose of the subject is to understand what drugs do to the livingorganisms and how their effects can be applied to therapeutics. The subject covers theinformation about the drugs like, mechanism of action, physiological and biochemicaleffects (pharmacodynamics) as well as absorption, distribution, metabolism and excretion(pharmacokinetics) along with the adverse effects, clinical uses, interactions, doses, contraindications and routes of administration of different classes of drugs.

Objectives: Upon completion of this course the student should be able to

- Understand the pharmacological actions of different categories of drugs
- Explain the mechanism of drug action at organ system/sub cellular/macromolecular levels.
- > Apply the basic pharmacological knowledge in the prevention and treatment of various diseases.
- > Observe the effect of drugs on animals by simulated experiments
- > Appreciate correlation of pharmacology with other bio medical sciences

#### **COURSE CONTENT**

UNIT	CONTENT	No. of
		Hrs.
Ι	General Pharmacology	08
	Introduction to Pharmacology- Definition, historical landmarks and scope of	
	pharmacology, nature and source of drugs, essential drugs concept and routes of	
	drug administration, Agonists, antagonists( competitive and non competitive),	
	sparereceptors, addiction, tolerance, dependence, tachyphylaxis, idiosyncrasy,	
	allergy. Pharmacokinetics- Membrane transport, absorption, distribution,	
	metabolism and excretion of drugs .Enzyme induction, enzyme inhibition,	
	kinetics of elimination	

P. Technical University Hamirpur - 177001

II	General Pharmacology	12								
	Pharmacodynamics- Principles and mechanisms of drug action. Receptor									
	theories and classification of receptors, regulation of receptors. drug receptors									
	interactionssignal transduction mechanisms, G-protein-coupled receptors, ion									
	channel receptor, transmembrane enzyme linked receptors, transmembrane JAK-									
	STAT bindingreceptor and receptors that regulate transcription factors, dose									
	responserelationship, therapeutic index, combined effects of drugs and factors									
	modifyingdrug action. Adverse drug reactions, Drug interactions									
	(pharmacokinetic and pharmacodynamic), Drug discovery and clinical evaluation									
	of new drugs -Drug discovery phase, preclinical evaluation phase, clinical trial									
	phase, phases of clinical trials and pharmacovigilance.									
III	Pharmacology of drugs acting on peripheral nervous system	10								
	Organization and function of ANS.Neurohumoral transmission,co-transmission									
	and classification of									
	neurotransmitters.Parasympathomimetics,Parasympatholytics,									
	Sympathomimetics, sympatholytics.Neuromuscular blocking agents and skeletal									
	muscle relaxants (peripheral).Local anesthetic agents.Drugs used in myasthenia									
	gravis and glaucoma									
IV	Pharmacology of drugs acting on central nervous system	08								
	Neurohumoral transmission in the C.N.S.special emphasis on importance of									
	variousneurotransmitters like with GABA, Glutamate, Glycine, serotonin,									
	dopamine.General anesthetics and pre-anesthetics.Sedatives, hypnotics and									
	centrally acting muscle relaxants. Anti-epileptics, Alcohols and disulfiram									
V	Pharmacology of drugs acting on central nervous system	07								
	Psychopharmacological agents: Antipsychotics, antidepressants, anti-anxiety									
	agents, anti-manics and hallucinogens. Drugs used in Parkinsons disease and									
	Alzheimer's disease.CNS stimulants and nootropics.Opioid analgesics and									
	antagonists, Drug addiction, drug abuse, tolerance and dependence

#### BP 405 T.PHARMACOGNOSY AND PHYTOCHEMISTRY I (Theory)

Teac	<b>Teaching Scheme</b>		Credits	Marks		Duration of End Semester	
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

**Teaching and Examination Scheme:** 

**Scope:** The subject involves the fundamentals of Pharmacognosy like scope, classification ofcrude drugs, their identification and evaluation, phytochemicals present in them and their medicinal properties.

**Objectives:** Upon completion of the course, the student shall be able to

- know the techniques in the cultivation and production of crude drugs
- ▶ know the crude drugs, their uses and chemical nature
- know the evaluation techniques for the herbal drugs
- > carry out the microscopic and morphological evaluation of crude drugs

#### **Course Content**

UNIT	CONTENT	No. of Hrs.
Ι	Introduction to Pharmacognosy:	08
	(a) Definition, history, scope and development of Pharmacognosy	
	(b) Sources of Drugs – Plants, Animals, Marine & Tissue culture	
	(c) Organized drugs, unorganized drugs (dried latex, dried juices, dried extracts,	
	gums andmucilages, oleoresins and oleo- gum -resins).	
	Classification of drugs:	
	Alphabetical, morphological, taxonomical, chemical, pharmacological, chemo	
	and serotaxonomical classification of drugs	
	Quality control of Drugs of Natural Origin:	
	Adulteration of drugs of natural origin. Evaluation by organoleptic, microscopic,	
	physical, chemical and biological methods and properties.	
	Quantitative microscopy of crude drugs including lycopodium spore method,	
	leafconstants, camera lucida and diagrams of microscopic objects to scale with	
	camera lucida.	

Page 82 of 161

H.P. Technical University Hamirpur - 177001

II	Cultivation, Collection, Processing and storage of drugs of natural origin:	10
	Cultivation and Collection of drugs of natural origin, Factors influencing	
	cultivation of medicinal plants.Plant hormones and their applications.Polyploidy,	
	mutation and hybridization with reference to medicinal plants, Conservation of	
	medicinal plants	
III	Plant tissue culture: Historical development of plant tissue culture, types of	07
	cultures, Nutritional requirements, growth and their maintenance. Applications of	
	plant tissue culture in pharmacognosy.Edible vaccines	
IV	Pharmacognosy in various systems of medicine: Role of Pharmacognosy in	10
	allopathy and traditional systems of medicine namely, Ayurveda, Unani, Siddha,	
	Homeopathy and Chinese systems of medicine.	
	Introduction to secondary metabolites: Definition, classification, properties	
	and test for identification of Alkaloids, Glycosides, Flavonoids, Tannins, Volatile	
	oil and Resins	
V	Study of biological source, chemical nature and uses of drugs of natural origin	08
	containingfollowing drugs	
	Plant Products:	
	Fibers - Cotton, Jute, Hemp	
	Hallucinogens, Teratogens, Natural allergens	
	Primary metabolites:	
	General introduction, detailed study with respect to chemistry, sources,	
	preparation, evaluation, preservation, storage, therapeutic used and commercial	
	utility as PharmaceuticalAids and/or Medicines for the following	
	Primarymetabolites:	
	Carbohydrates: Acacia, Agar, Tragacanth, Honey	
	Proteins and Enzymes : Gelatin, casein, proteolytic enzymes (Papain,	
	bromelain, serratiopeptidase, urokinase, streptokinase, pepsin).	
	Lipids(Waxes, fats, fixed oils) : Castor oil, Chaulmoogra oil, Wool Fat, Bees	
	Wax	
	Marine Drugs:	
	Novel medicinal agents from marine sources

UNIT	CONTENT	No. of Hrs.
Ι	<ul> <li>Preformulation Studies: Introduction to preformulation, goals and objectives, study ofphysicochemical characteristics of drug substances.</li> <li><i>a. Physical properties:</i> Physical form (crystal &amp; amorphous), particle size, shape, flowproperties, solubility profile (pKa, pH, partition coefficient), polymorphism</li> <li><i>b. Chemical Properties:</i> Hydrolysis, oxidation, reduction, racemisation, polymerization, BCS classification of drugs &amp; its significant, Application of preformulation considerations in the development of solid, liquid oral andparenteral dosage forms and its impact on stability of dosage forms.</li> </ul>	07
II	<b>Tablets:</b> a. Introduction, ideal characteristics of tablets, classification of tablets.Excipients,Formulation of tablets, granulation methods, compression andprocessing problems.Equipments and tablet tooling.b. Tablet coating: Types of coating, coating materials, formulation ofcoatingcomposition, methods of coating, equipment employed and defects incoating.c. Quality control tests: In process and finished product tests	10

Page **90** of **161**

	<b>T</b> :	
	Liquid orals: Formulation and manufacturing consideration of syrups and elixirs	
	suspensions and emulsions; Filling and packaging; evaluation of liquid orals	
	official in pharmacopoeia	
III	Capsules:	08
	a. <i>Hard gelatin capsules:</i> Introduction, Production of hard gelatin capsule shells.	
	Sizeof capsules, Filling, finishing and special techniques of formulation of hard	
	gelatincapsules, manufacturing defects. In process and final product quality	
	control testsfor capsules.	
	b. Soft gelatin capsules: Nature of shell and capsule content, size	
	ofcapsules, importance of base adsorption and minim/gram factors, production, in	
	process and final product quality control tests. Packing, storage and stability	
	testingof soft gelatin capsules and their applications.	
	Pellets: Introduction, formulation requirements, pelletization process,	
	equipments formanufacture of pellets	
IV	Parenteral Products:	10
	a. Definition, types, advantages and limitations. Preformulation factors and	
	essentialrequirements, vehicles, additives, importance of isotonicity	
	b. Production procedure, production facilities and controls, as eptic processing	
	c. Formulation of injections, sterile powders, large volume parenterals and	
	lyophilized products.	
	d. Containers and closures selection, filling and sealing of ampoules, vials and	
	infusionfluids. Quality control tests of parenteral products.	
	<b>Ophthalmic Preparations:</b> Introduction, formulation considerations;	
	formulation of eyedrops, eye ointments and eye lotions; methods of preparation;	
	labeling, containers; evaluation of ophthalmic preparations	
V	<b>Cosmetics:</b> Formulation and preparation of the following cosmetic preparations:	10
	lipsticks, shampoos, cold cream and vanishing cream, tooth pastes, hair dyes and	
	sunscreens.	
	Pharmaceutical Aerosols: Definition, propellants, containers, valves, types of	
	aerosolsystems; formulation and manufacture of aerosols; Evaluation of aerosols;	
	Qualitycontrol and stability studies.	
	Packaging Materials Science: Materials used for packaging of pharmaceutical

#### **Teaching and Examination Scheme:**

**Scope:** This subject is intended to impart the fundamental knowledge on various aspects(classification, mechanism of action, therapeutic effects, clinical uses, side effects and contraindications) of drugs acting on different systems of body and in addition, emphasison the basic concepts of bioassay.

**Objectives:** Upon completion of this course the student should be able to

- Understand the mechanism of drug action and its relevance in the treatment of different diseases
- Demonstrate isolation of different organs/tissues from the laboratory animals bysimulated experiments
- > Demonstrate the various receptor actions using isolated tissue preparation
- > Appreciate correlation of pharmacology with related medical sciences

UNIT	CONTENT	No. of				
		Hrs.				
Ι	Pharmacology of drugs acting on cardio vascular system	10				
	a. Introduction to hemodynamic and electrophysiology of heart.					
	b. Drugs used in congestive heart failure					
	c. Anti-hypertensive drugs.					
	d. Anti-anginal drugs.					
	e. Anti-arrhythmic drugs.					
	f. Anti-hyperlipidemic drugs.					
II	Pharmacology of drugs acting on cardio vascular system	10				
	a. Drug used in the therapy of shock.					
	b. Hematinics, coagulants and anticoagulants.					
	c. Fibrinolytics and anti-platelet drugs

	d. Plasma volume expanders	
	Pharmacology of drugs acting on urinary system	
	a. Diuretics	
	b. Anti-diuretics.	
III	Autocoids and related drugs	10
	a. Introduction to autacoids and classification	
	b. Histamine, 5-HT and their antagonists.	
	c. Prostaglandins, Thromboxanes and Leukotrienes.	
	d. Angiotensin, Bradykinin and Substance P.	
	e. Non-steroidal anti-inflammatory agents	
	f. Anti-gout drugs	
	g. Antirheumatic drugs	
IV	Pharmacology of drugs acting on endocrine system	08
	a. Basic concepts in endocrine pharmacology.	
	b. Anterior Pituitary hormones- analogues and their inhibitors.	
	c. Thyroid hormones- analogues and their inhibitors.	
	d. Hormones regulating plasma calcium level- Parathormone, Calcitonin and	
	Vitamin-D.	
	d. Insulin, Oral Hypoglycemic agents and glucagon.	
	e. ACTH and corticosteroids.	
V	Pharmacology of drugs acting on endocrine system	07
	a. Androgens and Anabolic steroids.	
	b. Estrogens, progesterone and oral contraceptives.	
	c. Drugs acting on the uterus.	
	Bioassay	
	a. Principles and applications of bioassay.	
	b.Types of bioassay	
	c. Bioassay of insulin, oxytocin, vasopressin, ACTH,d-tubocurarine,digitalis,	
	histamineand 5-HT

Teaching Sch		neme	Credits	Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
0	0	4	2	15	35	50	3 hours

Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos

- 1. Introduction to *in-vitro* pharmacology and physiological salt solutions.
- 2. Effect of drugs on isolated frog heart.
- 3. Effect of drugs on blood pressure and heart rate of dog.
- 4. Study of diuretic activity of drugs using rats/mice.
- 5. DRC of acetylcholine using frog rectus abdominis muscle.
- 6. Effect of physostigmine and atropine on DRC of acetylcholine using frog rectus

abdominis muscle and rat ileum respectively.

- 7. Bioassay of histamine using guinea pig ileum by matching method.
- 8. Bioassay of oxytocin using rat uterine horn by interpolation method.
- 9. Bioassay of serotonin using rat fundus strip by three point bioassay.
- 10. Bioassay of acetylcholine using rat ileum/colon by four point bioassay.
- 11. Determination of PA2 value of prazosin using rat anococcygeus muscle (bySchilds plot method).
- 12. Determination of PD2 value using guinea pig ileum.
- 13. Effect of spasmogens and spasmolytics using rabbit jejunum.
- 14. Anti-inflammatory activity of drugs using carrageenan induced paw-edemamodel.
- 15. Analgesic activity of drug using central and peripheral methods

# BP504 T. PHARMACOGNOSY AND PHYTOCHEMISTRY II (Theory)

Teac	hing Scl	neme	Credits	Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

#### **Teaching and Examination Scheme:**

**Scope:** The main purpose of subject is to impart the students the knowledge of how thesecondary metabolites are produced in the crude drugs, how to isolate and identify andproduce them industrially. Also this subject involves the study of producing the plants and phytochemicals through plant tissue culture, drug interactions and basic principles oftraditional system of medicine

**Objectives:** Upon completion of the course, the student shall be able to:

- know the modern extraction techniques, characterization and identification of theherbal drugs and phytoconstituents
- > understand the preparation and development of herbal formulation.
- understand the herbal drug interactions
- carryout isolation and identification of phytoconstituents

#### **COURSE CONTENT**

UNIT	CONTENT	No. of Hrs.
Ι	Metabolic pathways in higher plants and their determination	07
	a) Brief study of basic metabolic pathways and formation of different secondary	
	metabolitesthrough these pathways- Shikimic acid pathway, Acetate pathways	
	and Amino acid pathway.	
	b) Study of utilization of radioactive isotopes in the investigation of Biogenetic	
	studies.	
II	General introduction, composition, chemistry & chemical classes, biosources,	14
	therapeuticuses and commercial applications of followingsecondary metabolites:	
	Alkaloids: Vinca, Rauwolfia, Belladonna, Opium,	
	Phenylpropanoids and Flavonoids: Lignans, Tea, Ruta	
	Steroids, Cardiac Glycosides & Triterpenoids: Liquorice, Dioscorea, Digitalis	
Daga 00

#### **Teaching and Examination Scheme:**

**Scope**: This subject is designed to impart fundamental knowledge on the structure, chemistry and therapeutic value of drugs. The subject emphasis on modern techniques of rational drug design like quantitative structure activity relationship (QSAR), Prodrugconcept, combinatorial chemistry and Computer aided drug design (CADD). The subjectalso emphasizes on the chemistry, mechanism of action, metabolism, adverse effects, Structure Activity Relationships (SAR), therapeutic uses and synthesis of important drugs.

Objectives: Upon completion of the course student shall be able to

- > Understand the importance of drug design and different techniques of drugdesign.
- > Understand the chemistry of drugs with respect to their biological activity.
- > Know the metabolism, adverse effects and therapeutic value of drugs.
- ➤ Know the importance of SAR of drugs.

# **COURSE CONTENT**

**Note:** Study of the development of the following classes of drugs, Classification, mechanismofaction, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted by (\*)

					Exam		
3	1	0	4	25	75	100	3 hours

**Scope:** This subject is intended to impart the fundamental knowledge on various aspects(classification, mechanism of action, therapeutic effects, clinical uses, side effects and contraindications) of drugs acting on respiratory and gastrointestinal system, infectious diseases, immuno-pharmacology and in addition, emphasis on the principles of toxicology and chronopharmacology.

**Objectives:** Upon completion of this course the student should be able to:

- understand the mechanism of drug action and its relevance in the treatment of different infectious diseases
- > comprehend the principles of toxicology and treatment of various poisoningsand
- > appreciate correlation of pharmacology with related medical sciences.

UNIT	CONTENT	No. of Hrs.
Ι	Pharmacology of drugs acting on Respiratory system	10
	a. Anti -asthmatic drugs	
	b. Drugs used in the management of COPD	
	c. Expectorants and antitussives	
	d. Nasal decongestants	
	e. Respiratory stimulants	
	Pharmacology of drugs acting on the Gastrointestinal Tract	
	a. Antiulcer agents.	
	b. Drugs for constipation and diarrhoea.	
	c. Appetite stimulants and suppressants.	
	d. Digestants and carminatives.	

**COURSE CONTENT** 

Page 109 of 161

.P. Technical University Hamirpur - 177001

	e. Emetics and anti-emetics.	
II	Chemotherapy	10
	a. General principles of chemotherapy.	
	b. Sulfonamides and cotrimoxazole.	
	c. Antibiotics- Penicillins, cephalosporins, chloramphenicol,	
	macrolides,quinolones and fluoroquinolins, tetracycline and aminoglycosides	
III	Chemotherapy	10
	a. Antitubercular agents	
	b. Antileprotic agents	
	c. Antifungal agents	
	d. Antiviral drugs	
	e.Anthelmintics	
	f. Antimalarial drugs	
	g. Antiamoebic agents	
IV	Chemotherapy: Urinary tract infections and sexually transmitted diseases.	08
	Chemotherapy of malignancy	
	Immunopharmacology	
	a. Immunostimulants	
	b. Immunosuppressant	
	Protein drugs, monoclonal antibodies, target drugs to antigen, biosimilars	
V	Principles of toxicology	07
	a. Definition and basic knowledge of acute, subacute and chronic toxicity.	
	b. Definition and basic knowledge of genotoxicity, carcinogenicity,	
	teratogenicityand mutagenicity	
	c. General principles of treatment of poisoning	
	d. Clinical symptoms and management of barbiturates, morphine,	
	organophosphorphorus compound and lead, mercury and arsenic poisoning.	
	Chronopharmacology	
	a. Definition of rhythm and cycles.	
	b. Biological clock and their significance leading to chronotherapy.

#### BP 608 P. PHARMACOLOGY-III (Practical)

#### **Teaching and Examination Scheme:**

Teac	<b>Teaching Scheme</b>		Credits	Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
0	0	4	2	15	35	50	3 hours

\*Experiments are demonstrated by simulated experiments/videos

- 1. Dose calculation in pharmacological experiments
- 2. Antiallergic activity by mast cell stabilization assay
- 3. Study of anti-ulcer activity of a drug using pylorus ligand (SHAY) rat model andNSAIDS induced ulcer model.
- 4. Study of effect of drugs on gastrointestinal motility
- 5. Effect of agonist and antagonists on guinea pig ileum
- 6. Estimation of serum biochemical parameters by using semi- autoanalyser
- 7. Effect of saline purgative on frog intestine
- 8. Insulin hypoglycemic effect in rabbit
- 9. Test for pyrogens (rabbit method)
- 10. Determination of acute oral toxicity (LD50) of a drug from a given data
- 11. Determination of acute skin irritation / corrosion of a test substance
- 12. Determination of acute eye irritation / corrosion of a test substance
- 13. Calculation of pharmacokinetic parameters from a given data
- 14. Biostatistics methods in experimental pharmacology( student's t test, ANOVA)
- 15. Biostatistics methods in experimental pharmacology (Chi square test, WilcoxonSigned Rank test)

#### BP 603 T. HERBAL DRUG TECHNOLOGY (Theory)

Teac	<b>Teaching Scheme</b>		Scheme Credits		Marks	Duration of End Semester	
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

#### **Teaching and Examination Scheme:**

**Scope:** This subject gives the student the knowledge of basic understanding of herbal drugindustry, the quality of raw material, guidelines for quality of herbal drugs, herbal cosmetics, natural sweeteners, nutraceutical etc. The subject also emphasizes on Good ManufacturingPractices (GMP), patenting and regulatory issues of herbal drugs.

**Objectives:** Upon completion of this course the student should be able to:

- > understand raw material as source of herbal drugs from cultivation to herbal drugproduct
- know the WHO and ICH guidelines for evaluation of herbal drugs
- ▶ know the herbal cosmetics, natural sweeteners, nutraceuticals
- > appreciate patenting of herbal drugs, GMP.

#### **COURSE CONTENT**

UNIT	CONTENT								
Ι	Herbs as raw materials								
	Definition of herb, herbal medicine, herbal medicinal product, herbal drug								
	preparation, Source of Herbs, Selection, identification and authentication of								
	herbal materials, Processing of herbal raw material								
	Biodynamic Agriculture								
	Good agricultural practices in cultivation of medicinal plants including Organic								
	farming.Pest and Pest management in medicinal plants:								
	Biopesticides/Bioinsecticides.								
	Indian Systems of Medicine								
	a) Basic principles involved in Ayurveda, Siddha, Unani and Homeopathy								
	b) Preparation and standardization of Ayurvedic formulations viz Aristas and								
	Asawas,Ghutika,Churna, Lehya and Bhasma.								

P. Technical University Hamirpur - 177001

II	Nutraceuticals	07					
	General aspects, Market, growth, scope and types of products available in the						
	market. Healthbenefits and role of Nutraceuticals in ailments like Diabetes, CVS						
	diseases, Cancer, Irritablebowel syndrome and various Gastro intestinal diseases.						
	Study of following herbs as health food: Alfaalfa, Chicory, Ginger, Fenugreek,						
	Garlic, Honey, Amla, Ginseng, Ashwagandha, Spirulina						
	Herbal-Drug and Herb-Food Interactions: General introduction to interaction						
	and classification. Study of following drugs and their possible side effects and						
	interactions:Hypercium, kava-kava, Ginkobiloba, Ginseng, Garlic, Pepper &						
	Ephedra.						
III	Herbal Cosmetics	10					
	Sources and description of raw materials of herbal origin used via, fixed oils,						
	waxes, gumscolours, perfumes, protective agents, bleaching agents, antioxidants						
	in products such as skincare, hair care and oral hygiene products.						
	Herbal excipients:						
	Herbal Excipients - Significance of substances of natural origin as excipients -						
	colorants, sweeteners, binders, diluents, viscosity builders, disintegrants, flavors						
	& perfumes.						
	Herbal formulations :						
	Conventional herbal formulations like syrups, mixtures and tablets and Novel						
	dosage formslike phytosomes						
IV	<b>Evaluation of Drugs</b> WHO & ICH guidelines for the assessment of herbal drugs	10					
	Stability testing of herbal drugs.						
	Patenting and Regulatory requirements of natural products:						
	a) Definition of the terms: Patent, IPR, Farmers right, Breeder's right,						
	Bioprospecting and Biopiracy						
	b) Patenting aspects of Traditional Knowledge and Natural Products. Case study						
	of Curcuma& Neem.						
	Regulatory Issues - Regulations in India (ASU DTAB, ASU DCC), Regulation						
	ofmanufacture of ASU drugs - Schedule Z of Drugs & Cosmetics Act for ASU						
	drugs.						
V	General Introduction to Herbal Industry	07					

Page **114** of **161** 

Dean H.P. Technical University Hamirpur - 177001

Herbal drugs industry: Present scope and future prospects.

A brief account of plant based industries and institutions involved in work on medicinal andaromatic plants in India.

Schedule T – GoodManufacturing Practice of Indian systems of medicine Components of GMP (Schedule – T) and its objectivesInfrastructural requirements, working space, storage area, machinery and equipments, standard operating procedures, health and hygiene, documentation and records.

#### BP 604 T. BIOPHARMACEUTICS AND PHARMACOKINETICS (Theory)

**Teaching and Examination Scheme:** 

Teac	Teaching Scheme Credits			its Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

**Scope:**This subject is designed to impart knowledge and skills of Biopharmaceuticsand pharmacokinetics and their applications in pharmaceutical development, design ofdose and dosage regimen and in solving the problems arised therein.

**Objectives:** Upon completion of the course student shall be ableto:

- Understand the basic concepts in biopharmaceutics and pharmacokinetics andtheir significance.
- Use of plasma drug concentration-time data to calculate the pharmacokineticparameters to describe the kinetics of drug absorption, distribution, metabolism, excretion, elimination.
- To understand the concepts of bioavailability and bioequivalence of drugproducts and their significance.
- > Understand various pharmacokinetic parameters, their significance & applications.

#### COURSECONTENT

UNIT	CONTENT	No. of					
		Hrs.					
Ι	Introduction to Biopharmaceutics						
	Absorption; Mechanisms of drug absorption through GIT, factors influencing						
	drugabsorption though GIT, absorption of drug from Non per oral extra-vascular						
	routes, Distribution Tissue permeability of drugs, binding of drugs, apparent,						
	volumeof drug distribution, plasma and tissue protein binding of drugs, factors						
	affectingprotein-drug binding. Kinetics of protein binding, Clinical significance						
	of proteinbinding of drugs						
II	Elimination: Drug metabolism and basic understanding metabolic pathways	10					
	renalexcretion of drugs, factors affecting renal excretion of drugs, renal						
	clearance, Non renalroutes of drug excretion of drugs						

Page **117** of **161** 

I.P. Technical University Hamirpur - 177001

	Bioavailability and Bioequivalence: Definition and Objectives of								
	bioavailability, absolute and relative bioavailability, measurement of								
	bioavailability, in-vitro drugdissolution models, in-vitro-in-vivo correlations,								
	bioequivalence studies, methods toenhance the dissolution rates and								
	bioavailability of poorly soluble drugs.								
III	Pharmacokinetics: Definition and introduction to Pharmacokinetics,	10							
	Compartmentmodels, Non compartment models, physiological models, One								
	compartment openmodel. (a). Intravenous Injection (Bolus) (b). Intravenous								
	infusion and (c) Extravascular administrations. Pharmacokinetics parameters -								
	KE ,t1/2,Vd,AUC,Ka, Clt andCLR- definitions methods of eliminations,								
	understanding of their significance and application								
IV	Multicompartment models: Two compartment open model. IV bolusKinetics of	08							
	multiple dosing, steady state drug levels, calculation of loading andmainetnance								
	doses and their significance in clinical settins.								
V	Nonlinear Pharmacokinetics: a. Introduction, b. Factors causing Non-linearity.	07							
	c. Michaelis-menton method of estimating parameters, Explanation with example								
	ofdrugs.

#### **BP 605 T. PHARMACEUTICAL BIOTECHNOLOGY (Theory)**

Teaching Scheme Credits			Credits	Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

**Teaching and Examination Scheme:** 

**Scope:**Biotechnology has a long promise to revolutionize the biological sciences andtechnology.Scientific application of biotechnology in the field of genetic engineering, medicine and fermentation technologymakes the subject interesting.Biotechnology is leading to new biological revolutions in diagnosis, preventionand cure of diseases, new and cheaper pharmaceutical drugs.Biotechnology has already produced transgenic crops and animals and the future promises lot more.It is basically a research-based subject.

Objectives: Upon completion of the subject student shall be able to;

- > Understanding the importance of Immobilized enzymes in PharmaceuticalIndustries
- > Genetic engineering applications in relation to production of pharmaceuticals
- Importance of Monoclonal antibodies in Industries
- > Appreciate the use of microorganisms in fermentation technology

UNIT	CONTENT	No. of Hrs.
I	<ul> <li>a) Brief introduction to Biotechnology with reference to Pharmaceutical Sciences.</li> <li>b) Enzyme Biotechnology- Methods of enzyme immobilization and applications.</li> <li>c) Biosensors- Working and applications of biosensors in Pharmaceutical Industries.</li> <li>d) Brief introduction to Protein Engineering.</li> <li>e) Use of microbes in industry. Production of Enzymes- General consideration - Amylase, Catalase, Peroxidase, Lipase, Protease, Penicillinase.</li> <li>f) Basic principles of genetic engineering.</li> </ul>	10
Π	<ul> <li>a) Study of cloning vectors, restriction endonucleases and DNA ligase.</li> <li>b) Recombinant DNA technology. Application of genetic engineering in medicine.</li> <li>c) Application of r DNA technology and genetic engineering in the production of:i) Interferon ii) Vaccines- hepatitis- B iii) Hormones-Insulin.</li> <li>d) Brief introduction to PCR</li> </ul>	10

Page **120** of **161** 

P. Technical University Hamirpur - 177001

III	Types of immunity- humoral immunity, cellular immunity	10						
	a) Structure of Immunoglobulins							
	b) Structure and Function of MHC							
	c) Hypersensitivity reactions, Immune stimulation and Immune suppressions.							
	d) General method of the preparation of bacterial vaccines, toxoids, viral vaccine,							
	antitoxins, serum-immune blood derivatives and other products relative to							
	immunity.							
	e) Storage conditions and stability of official vaccines							
	f) Hybridoma technology- Production, Purification and Applications							
	g) Blood products and Plasma Substituties.							
IV	a) Immuno blotting techniques- ELISA, Western blotting, Southern blotting.	08						
	b) Genetic organization of Eukaryotes and Prokaryotes							
	c) Microbial genetics including transformation, transduction, conjugation, plasmids							
	andtransposons.d) Introduction to Microbial biotransformation and applications.e)							
	Mutation: Types of mutation/mutants.							
V	a) Fermentation methods and general requirements, study of media, equipments,	07						
	sterilization methods, aeration process, stirring.							
	b) Large scale production fermenter design and its various controls.c) Study of the							
	production of - penicillins, citric acid, Vitamin B12, Glutamic acid, Griseofulvin,							
	d) Blood Products: Collection, Processing and Storage of whole human blood,							
	driedhuman plasma, plasma Substituties.

#### **Teaching and Examination Scheme:**

**Scope:** This subject deals with the application of instrumental methods in qualitative andquantitative analysis of drugs. This subject is designed to impart a fundamentalknowledge on the principles and instrumentation of spectroscopic and chromatographictechnique. This also emphasizes on theoretical and practical knowledge on modernanalytical instruments that are used for drug testing.

Objectives: Upon completion of the course the student shall be able to

- Understand the interaction of matter with electromagnetic radiations and itsapplications in drug analysis
- > Understand the chromatographic separation and analysis of drugs.
- > Perform quantitative & qualitative analysis of drugs using various analyticalinstruments.

UNIT	CONTENT	No. of Hrs.			
Ι	<b>UV Visible spectroscopy</b> Electronic transitions, chromophores, auxochromes, spectral shifts, solvent effect	10			
	onabsorption spectra, Beer and Lambert's law, Derivation and deviations.				
	Instrumentation - Sources of radiation, wavelength selectors, sample cells,				
	detectors-Photo tube, Photomultiplier tube, Photo voltaic cell, Silicon				
	Photodiode.Applications - Spectrophotometric titrations, Single component and multi componentanalysis				
	Fluorimetry				
	Theory, Concepts of singlet, doublet and triplet electronic states, internal and				
	externalconversions, factors affecting fluorescence, quenching, instrumentation and applications				
II	<b>IR spectroscopy:</b> Introduction, fundamental modes of vibrations in poly atomic	10

#### **BP 703T. PHARMACY PRACTICE (Theory)**

#### **Teaching and Examination Scheme:**

Teac	<b>Teaching Scheme</b>		Credits	Marks			Duration of End Semester
L	Т	Р	С	Sessional	Sessional End Semester Total		Examination
				Exam			
3	1	0	4	25	75	100	3 hours

**Scope:** In the changing scenario of pharmacy practice in India, for successful practice of Hospital Pharmacy, the students are required to learn various skills like drug distribution, drug information, and therapeutic drug monitoring for improved patient care. Incommunity pharmacy, students will be learning various skills such as dispensing of drugs, responding to minor ailments by providing suitable safe medication, patient counselling for improved patient care in the community set up.

Objectives: Upon completion of the course, the student shall be able to

- know various drug distribution methods in a hospital
- > appreciate the pharmacy stores management and inventory control
- > monitor drug therapy of patient through medication chart review and clinicalreview
- > obtain medication history interview and counsel the patients
- identify drug related problems
- detect and assess adverse drug reactions
- interpret selected laboratory results (as monitoring parameters in therapeutics) ofspecific disease states
- know pharmaceutical care services
- do patient counseling in community pharmacy;
- > appreciate the concept of Rational drug therapy.

UNIT	CONTENT						
		Hrs.					
Ι	a) Hospital and it's organization: Definition, Classification of hospital-	10					
	Primary, Secondary and Tertiary hospitals,						
	Classification based on clinical and non- clinical basis, Organization Structure of						
	aHospital, and Medical staffs involved in the hospital and their functions.						
	b) Hospital pharmacy and its organization: Definition, functions of hospital						
	pharmacy, Organization structure, Location, Layoutand staff requirements, and						

Page **130** of **161** 

P. Technical University Hamirpur - 177001

	Responsibilities and functions of hospital pharmacists.	
	c) Adverse drug reaction: Classifications - Excessive pharmacological effects,	
	secondary pharmacological	
	effects, idiosyncrasy, allergic drug reactions, genetically determined toxicity,	
	toxicityfollowing sudden withdrawal of drugs, Drug interaction- beneficial	
	interactions, adverse interactions, and pharmacokinetic drug interactions, Methods	
	for detectingdrug interactions, spontaneous case reports and record linkage	
	studies, and Adversedrug reaction reporting and management.	
	d) Community Pharmacy: Organization and structure of retail and wholesale	
	drug store, types and design, Legalrequirements for establishment and	
	maintenance of a drug store, Dispensing ofproprietary products, maintenance of	
	records of retail and wholesale drug store.	
II	a) Drug distribution system in a hospital: Dispensing of drugs to inpatients,	10
	types of drug distribution systems, charging policyand labelling, Dispensing of	
	drugs to ambulatory patients, and Dispensing of controlled drugs.	
	b) Hospital formulary: Definition, contents of hospital formulary,	
	Differentiation of hospital formulary andDrug list, preparation and revision, and	
	addition and deletion of drug from hospitalformulary.	
	c) Therapeutic drug monitoring: Need for Therapeutic Drug Monitoring,	
	Factors to be considered during the Therapeutic DrugMonitoring, and Indian	
	scenario for Therapeutic Drug Monitoring.	
	d) Medication adherence: Causes of medication non-adherence, pharmacist role	
	in the medication adherence, and monitoring of patient medication adherence.	
	e) Patient medication history interview: Need for the patient medication	
	history interview, medication interview forms.	
	f) Community pharmacy management: Financial, materials, staff, and	
	infrastructure requirements.	
III	a) Pharmacy and therapeutic committee: Organization, functions, Policies of	10
	the pharmacy and therapeutic committee in	
	including drugs into formulary, inpatient and outpatient prescription, automatic	
	stoporder, and emergency drug list preparation.	
	<u> </u>

r		
	b) Druginformation services: Drug and Poison information centre, Sources of	
	drug information, Computerised	
	services, and storage and retrieval of information.	
	c) Patientcounseling: Definition of patient counseling; steps involved in patient	
	counseling, and Special	
	cases that require the pharmacist	
	d) Education and training program in the hospital: Role of pharmacist in the	
	education and training program, Internal and external	
	training program, Services to the nursing homes/clinics, Code of ethics for	
	communitypharmacy, and Role of pharmacist in the interdepartmental	
	communication and community health education.	
	e) Prescribed medication order and communication skills: Prescribed	
	medication order- interpretation and legal requirements, andCommunication	
	skills- communication with prescribers and patients.	
IV	a) Budgetpreparation and implementation: Budget preparation and	08
	implementation	
	b) Clinical Pharmacy: Introduction to Clinical Pharmacy, Concept of clinical	
	pharmacy, functions and responsibilities of clinical pharmacist, Drug therapy	
	monitoring - medication chartreview, clinical review, pharmacist intervention,	
	Ward round participation, Medicationhistory and Pharmaceutical care.Dosing	
	pattern and drug therapy based on Pharmacokinetic & disease pattern.	
	c) Over the counter (OTC) sales: Introduction and sale of over the counter, and	
	Rational use of common over the	
	counter medications.	
V	a) Drug store management and inventory control: Organisation of drug store,	07
	types of materials stocked and storage conditions, Purchaseand inventory control:	
	principles, purchase procedure, purchase order, procurementand stocking,	
	Economic order quantity, Reorder quantity level, and Methods used forthe	
	analysis of the drug expenditure	
	b) Investigational use of drugs: Description, principles involved, classification,	
	control, identification, role of hospitalpharmacist, advisory committee.	
	c) Interpretation of Clinical Laboratory Tests: Blood chemistry, hematology,

#### **BP 805T: PHARMACOVIGILANCE (Theory)**

**Teaching and Examination Scheme:** 

Teac	hing Scl	neme	Credits	Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

**Scope:** This paper will provide an opportunity for the student to learn about development ofpharmacovigilance as a science, basic terminologies used in pharmacovigilance, global scenarioof Pharmacovigilance, train students on establishing pharmacovigilance programme in anorganization, various methods that can be used to generate safety data and signal detection. Thispaper also develops the skills of classifying drugs, diseases and adverse drug reactions.

#### **Objectives:**

At completion of this paper it is expected that students will be able to (know, do, and appreciate):

- > Why drug safety monitoring is important?
- History and development of pharmacovigilance
- > National and international scenario of pharmacovigilance
- Dictionaries, coding and terminologies used in pharmacovigilance
- > Detection of new adverse drug reactions and their assessment
- International standards for classification of diseases and drugs
- > Adverse drug reaction reporting systems and communication in pharmacovigilance
- Methods to generate safety data during pre clinical, clinical and post approval phases ofdrugs' life cycle
- > Drug safety evaluation in paediatrics, geriatrics, pregnancy and lactation
- > Pharmacovigilance Program of India (PvPI) requirement for ADR reporting in India
- > ICH guidelines for ICSR, PSUR, expedited reporting, pharmacovigilance planning
- CIOMS requirements for ADR reporting
- ➢ Writing case narratives of adverse events and their quality.

### BP 806 ET. QUALITY CONTROL AND STANDARDIZATION OF HERBALS(Theory)

Teac	<b>Teaching Scheme</b>		neme Credits		Marks	Duration of End Semester	
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

**Teaching and Examination Scheme:** 

**Scope:** In this subject the student learns about the various methods and guidelines forevaluation and standardization of herbs and herbal drugs. The subject also provides anopportunity for the student to learn cGMP, GAP and GLP in traditional system of medicines.

**Objectives:** Upon completion of the subject student shall be able to;

- know WHO guidelines for quality control of herbal drugs
- know Quality assurance in herbal drug industry
- ▶ know the regulatory approval process and their registration in Indian and international markets
- > appreciate EU and ICH guidelines for quality control of herbal drugs

## **COURSE CONTENT**

UNIT	CONTENT	No. of Hrs.
Ι	Basic tests for drugs - Pharmaceutical substances, Medicinal plants materials and	10
	dosageforms, WHO guidelines for quality control of herbal drugs.	
	Evaluation of commercial crude drugs intended for use	
II	Quality assurance in herbal drug industry of cGMP, GAP, GMP and GLP in	10
	traditional system of medicine.WHO Guidelines on current good manufacturing	
	Practices (cGMP) for Herbal Medicines. WHO Guidelines on GACP for	
	Medicinal Plants.	
III	EU and ICH guidelines for quality control of herbal drugs.	10
	Research Guidelines for Evaluating the Safety and Efficacy of Herbal Medicines	
IV	Stability testing of herbal medicines. Application of various chromatographic	08
	techniquesin standardization of herbal products.Preparation of documents for	
	new drug application and export registrationGMP requirements and Drugs &	
	Cosmetics Act provisions.	
V	Regulatory requirements for herbal medicines.	07
	WHO guidelines on safety monitoring of herbal medicines in pharmacovigilance

Teac	hing Scl	neme	Credits	Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

**Scope:** This subject is designed to provide detailed knowledge of rational drug designprocess and various techniques used in rational drug design process.

Objectives: Upon completion of the course, the student shall be able to understand

- Design and discovery of lead molecules
- > The role of drug design in drug discovery process
- > The concept of QSAR and docking
- > Various strategies to develop new drug like molecules.
- > The design of new drug molecules using molecular modeling software

## **COURSE CONTENT**

UNIT	CONTENT	No. of Hrs.								
Ι	<b>Introduction to Drug Discovery and Development:</b> Stages of drug discovery and development	10								
	Lead discovery and Analog Based Drug Design: Rational approaches to lead									
	discovery based on traditional medicine, Random screening, Non-random									
	screening, serendipitous drug discovery, lead discovery based on drug									
	metabolism, lead discovery based onclinical observation.									
	Analog Based Drug Design: Bioisosterism, Classification,									
	Bioisostericreplacement. Any three case studies									
Π	<b>Quantitative Structure Activity Relationship (QSAR):</b> SAR versus QSAR, History and development of QSAR, Types of physicochemical parameters, experimental and theoretical approaches for the determination of physicochemical parameters such as Partitioncoefficient, Hammet's substituent constant and Tafts steric constant.Hansch analysis, Free Wilson analysis, 3D-QSAR approaches likeCOMFA and COMSIA.	10								
III	Molecular Modeling and virtual screening techniques:	10								

Page **151** of **161** 

H.P. Technical University Hamirpur - 177001

	Virtual Screening techniques: Drug likeness screening, Concept							
	ofpharmacophore mapping and pharmacophore based Screening,							
	Molecular docking: Rigid docking, flexible docking, manual docking, Docking							
	based screening. De novo drug design.							
IV	Informatics & Methods in drug design: Introduction to Bioinformatics,							
	chemoinformatics. ADME databases, chemical, biochemical and pharmaceutical							
	databases.							
V	Molecular Modeling: Introduction to molecular mechanics and	07						
	quantummechanics. Energy Minimization methods and Conformational							
	Analysis, global conformational minima determination.

### **BP808ET: CELL AND MOLECULAR BIOLOGY (Elective subject)**

Page 152 of 161

P. Technical University Hamirpur - 177001

#### **Teaching and Examination Scheme:**

Teac	hing Scl	neme	Credits	Marks			Duration of End Semester
L	Т	Р	С	Sessional	End Semester	Total	Examination
					Exam		
3	1	0	4	25	75	100	3 hours

**Scope:**Cell biology is a branch of biology that studies cells – their physiologicalproperties, their structure, the organelles they contain, interactions with theirenvironment, their life cycle, division, death and cell function. This is done both on a microscopic and molecular level. Cell biology research encompasses both the great diversity of single-celledorganisms like bacteria and protozoa, as well as the many specialized cells inmulti-cellular organismssuch as humans, plants, and sponges.

**Objectives:** Upon completion of the subject student shall be able to;

- Summarize cell and molecular biology history.
- > Summarize cellular functioning and composition.
- > Describe the chemical foundations of cell biology.
- Summarize the DNA properties of cell biology.
- Describe protein structure and function.
- > Describe cellular membrane structure and function.
- > Describe basic molecular genetic mechanisms.
- Summarize the Cell Cycle

# **COURSE CONTENT**

UNIT	CONTENT	No. of
I	a) Cell and Molecular Biology: Definitions theory and basics and Applications.	Hrs. 10
	b) Cell and Molecular Biology: History and Summation.	-
	c) Properties of cells and cell membrane.	
	d) Prokaryotic versus Eukaryotic	
	e) Cellular Reproduction	
	f) Chemical Foundations – an Introduction and Reactions (Types)	
II	a) DNA and the Flow of Molecular Information	10
	b) DNA Functioning	
	c) DNA and RNA	

Page 153 of 161

P. Technical University Hamirpur - 177001

	d) Types of RNA							
	e) Transcription and Translation							
III	a) Proteins: Defined and Amino Acids	10						
	b) Protein Structure							
	c) Regularities in Protein Pathways							
	d) Cellular Processes							
	e) Positive Control and significance of Protein Synthesis							
IV	a) Science of Genetics	08						
	b) Transgenics and Genomic Analysis							
	c) Cell Cycle analysis							
	d) Mitosis and Meiosis							
	e) Cellular Activities and Checkpoints							
V	a) Cell Signals: Introduction	07						
	b) Receptors for Cell Signals							
	c) Signaling Pathways: Overview							
	d) Misregulation of Signaling Pathways							
	e) Protein-Kinases: Functioning

**Scope:**This subject is designed to impart the basic knowledge of cosmetic sciences

**Objectives :** Upon completion of the course the student shall be able to,

- > Appreciate the applications of various commonly used cosmetic excipients.
- Appreciate and demonstrate the various formulation methods used in cosmetic formulations
- > Appreciate and demonstrate the importance of analytical methods used in cosmetics.

### **COURSE CONTENT**

UNIT	CONTENT	No. of Hrs.					
Ι	Classification of cosmetic and cosmeceutical products ; Definition of cosmetics as per	10					
	Indian and EU regulations, Evolution of cosmeceuticalsfrom cosmetics, cosmetics as						
	quasi and OTC drugs. Cosmetic excipients: Surfactants, rheologymodifiers,						
	humectants, emollients, preservatives. Classification and application. Skin: Basic						
	structure and function of skin. Hair: Basic structure of hair. Hair growth cycle. Oral						
	Cavity: Common problem associated with teeth and gums.						
II	Principles of formulation and building blocks of skin care products:						
	Face wash, Moisturizing cream, Cold Cream, Vanishing cream and their advantages						
	anddisadvantages.Application of these products in formulation of						
	cosmecuticals. Antiperspants & deodorants- Actives & mechanism of action.						
	Principles of formulation and building blocks of Hair care products:						
	Conditioning shampoo, Hair conditioner, anti-dandruff shampoo. Hair oils. Chemistry						
	and formulation of Para-phylene diamine based hair dye.Principles of formulation and						
	building blocks of oral care products:Toothpaste for bleeding gums, sensitive teeth.						
	Teeth whitening, Mouthwash.						
III	Sun protection, Classification of Sunscreens and SPF.	10					

Page **156** of **161**
